IN THEIR OWN WORDS: TOPPER+, our new meal topper line for both cats and dogs, offers powerful probiotic support for digestive and immune health in three irresistible flavors: chicken breast, salmon fillet and turkey heart. Each TOPPER+ flavor is a pure, all-natural USA-sourced animal protein that is freeze-dried raw in Connecticut. Ground into a nutrient-rich powder, each meal topper is then seamlessly blended with a science-backed probiotic.

Delicious, nutritious TOPPER+ is a multi-solution approach to pet health and well-being. As a single-source protein meal topper, it entices pets to gobble up their daily meals and/or medicine and is ideal for pets with sensitivities. As a probiotic supplement, TOPPER+ promotes a healthy microbiome, and ultimately supports optimal digestive health and immune system function, as well as protein utilization. Like our Liquid CoQ10 supplement and single-ingredient treat and topper lines, TOPPER+ is designed for cats and dogs alike. Pets love it!

WHAT MAKES THIS PRODUCT SPECIAL? Each TOPPER+ probiotic meal topper contains only two high quality ingredients: probiotic and chicken breast, salmon fillet or turkey heart. No fillers, binders, preservatives or artificial flavors - just healthy ingredients dogs and cats thrive on! A savory delivery system pets can't get enough of, TOPPER+ makes probiotic administration a breeze!

WHAT THEY'RE KNOWN FOR: Ageless Paws offers health-supporting supplements, treats and meal toppers for cats and dogs, all chosen or developed by our founder, cardiologist and nutrition specialist Dr. Sinatra. Purity Is Our Priority™.

RETAILER REVIEW: "We have an herb room, and I have used many of the products from Ageless Paws' parent company, Vervana. I like Ageless Paws' Toppers because it makes it so easy to administer probiotics - just add to your pup's regular meal. I have a dog with a heart murmur, and I also like the fact that the Turkey Heart Topper includes the same organ." — Jennifer Mohr, Paw Print Pantry, Niantic, CT
