IN THEIR OWN WORDS:

Sleepypod's multifunctional carriers were created with your pet's well-being in mind. Designed as cozy beds that travel with your pet to their destination, Sleepypod carriers help to mitigate fear by ensuring the pet is always traveling in a familiar space. Every Sleepypod carrier includes PPRS technology that enables it to serve as a crash-tested car seat. Thoughtful features include machine-washable Ultra Plush bedding, a safety tether to prevent quick escapes, tear-resistant mesh and so much more.

WHAT MAKES THIS PRODUCT SPECIAL? The safety of your pet's products shouldn't be a guessing game. Sleepypod products are researched and tested throughout every step of the design process before going to market. The Sleepypod Safety Test Program requires that every one of our products meet the highest standards for safety in order to reduce pet exposure to any potential hazards.

WHAT THEY'RE KNOWN FOR:

Sleepypod is the first name in safety for beds, carriers, car harnesses, leashes, walking harnesses and collars. Behind every Sleepypod product, you'll find safety beyond compare and an unmatched commitment to our furry friends.

RETAILER REVIEW: "What sets Sleepypod apart is that they work scientifically to keep dogs safe, whether it's during travel in the car or just out walking. Their products are research-tested and proven." — Paha Kopytov, Bones, Vancouver, BC, Canada
