BREAKING NEWS:
PetStack POS & Retail Software is
Coming Soon!

In FieldStack's own words

We're excited to announce our upcoming new POS & software solution for small pet retail chains and indie pet stores: PetStack. This is for retailers craving the results of a unified commerce platform, but not ready for an enterprise-level solution. Sign up for early access: **FieldStack.com/PetStack**

What is FieldStack known for?

We're known for our all-in-one retail tech solution that includes POS & store operations, eCommerce, loyalty, inventory & supply chain, and advanced analytics with AI-driven insights. Using the same technology that powers our unified commerce platform, we've created a new simplified version for smaller pet retailers: PetStack

Why did FieldStack get into the pet industry?

We started with one pet store chain in Maine and never looked back. Today, we help all-sized retailers – including the 2024 Retailer Excellence Award winner, now with 180+ stores in 19 states. We know the unique challenges pet stores face, and we love solving them with smarter software.

What makes this product special?

PetStack, launching in Q3, is built for smaller pet retailers who aren't ready for FieldStack's full platform but need more than basic POS. After years of hearing their frustrations at Super-Zoo, Global Pet, and online, we designed PetStack to finally meet their needs.
