## In the brand's own words:

Yummy Combs® is a revolutionary oral care treat that turns daily dental hygiene from a stressful chore into a rewarding bonding moment between dogs and their pet parents. Featuring a patented honeycomb design, Yummy Combs is clinically proven to remove hardened tartar—something standard brushing often cannot—and provides complete and balanced nutrition in every treat. Designed as a “doggie-powered toothbrush,” it reaches 360 degrees around each tooth to scrub, floss, and clean effectively. Dogs love the taste, pet parents love the results, and together they enjoy a simpler, healthier daily routine.

## What is Pet's Best Life known for?

Yummy Combs is known for redefining canine oral care by achieving what was once thought impossible—safely removing existing hardened

tartar with a treat. Clinically proven to reduce hardened tartar by more than 26% and freshen breath by 46%, it's the world's first and only science-backed dental treat with these results. Its patented hexagonal honeycomb structure provides up to 256 scrubbing surfaces that clean to the gumline, and it holds the prestigious Veterinary Oral Health Council (VOHC) Seal of Acceptance for Tartar Control. Yummy Combs

Dogs LOVE the taste of Yummy Combs. Available in 5 sizes based on the weight of the dog.

stands out for delivering both clinical performance and a treat dogs truly love.

## What's new?

Pet's Best Life developed Yummy Combs to address the widespread but often overlooked epidemic of canine periodontal disease, which affects the majority of adult dogs and can lead to serious systemic health issues. Motivated by a mission to help people “love their dogs longer,” the founders sought to replace ineffective brushing routines with a science-based, dog-friendly solution that truly improves oral health. Their background in innovation and problem-solving led to the creation of a product capable of removing hardened tartar—a breakthrough previously considered impossible—and supporting a dog's overall wellbeing

through smarter, safer daily nutrition.

## What makes this product/product line special?

Yummy Combs elevates daily canine wellness by pairing proven oral care performance with dense nutrition, safety engineering, and craveable flavor. Its patented honeycomb design wraps 360° around each tooth to scrub and floss, clinically removing over 26% of hardened tartar, freshening breath, and carrying the VOHC Seal for Tartar Control. With more than 44% high quality protein and 12 wellness ingredients, it functions as a complete daily supplement—not just a treat. A wide, flat shape helps prevent gulping, while Slick'M™ speeds dissolvability to reduce blockage risk. And dogs love the taste—turning dental care into a rewarding ritual.
